

Tournamate — Your Netball Tournament, Sorted

A one-page guide to what your Tournamate pilot includes. *(Internal companion: [uk-netball-pilot-scope.md](#)).*

Hello <Club / league name> 🙌 — here's exactly what you get for your tournament on <Tournament date>, what we'll do for you, and what isn't part of this first run. No jargon, no surprises.

What Tournamate does for your event

Tournamate is an **online tournament manager**. We help you set everything up, then on the day you (or your court helpers) enter scores and everyone sees live results on a public web page — including a free mobile app for spectators.

You'll be able to:

- 🏆 Run your tournament structure — divisions (age groups/streams), pools, round-robins, and knockout brackets.
 - 👥 Add your teams and players (or send us a spreadsheet and we'll load them).
 - 📅 See a clear schedule of which game is on which court and when.
 - 📱 Enter scores easily — on a laptop, tablet, or phone.
 - 📷 Let court helpers submit scores by scanning a **QR code** — no logins to remember.
 - 📸 Snap a photo of the paper scoresheet and attach it to the match, just in case.
 - 📊 Show **live standings and results** on a public page anyone can open on their phone.
 - 📋 Use netball scoring out of the box (or tweak the points and tie-breakers to your rules).
 - 👤 Keep track of umpires and their assignments.
 - 🖨️ Print scorecards and schedules for the courts.
-

What we do for you (concierge setup)

You don't have to learn the system on your own:

- We **build your tournament for you** — structure, teams, fixtures, schedule, and scoring rules.
- We give you a quick **walkthrough** before the day so entering scores feels easy.
- We're **reachable on the day** if anything comes up.

Your contact: <support contact> · How to reach us: <email / WhatsApp / phone> · We'll reply <response expectation>.

What's not included this time (and why that's OK)

This first pilot is deliberately focused so it's reliable and stress-free. Not included yet:

- **Working offline** — Tournamate needs internet at the venue. We'll help you plan wifi or a phone hotspot, and you keep paper scoresheets as a backup. *(Live online results are the whole point.)*
- **A downloadable admin app** — you just use a web browser on a laptop or tablet; nothing to install.
- **Online payments or ticketing** — handle team fees and entry however your club already does. Tournamate won't take payments.
- **A subscription to set up yourself** — there's nothing to buy in-app; we onboard you directly.
- **Your own web address / full branding** — your results page lives on the standard Tournamate link for now.
- **Push notifications / email alerts** — spectators just refresh the live page to see the latest scores.

Anything on this list that you'd love to have? Tell us — it helps shape what we build next.

Quick readiness checklist for you

- ☐ Send us your divisions, teams, and players (a spreadsheet is fine).
- ☐ Tell us your competition date(s), venue, and number of courts.
- ☐ Confirm your scoring rules (or use the netball default).
- ☐ Decide who will enter scores on the day.
- ☐ Check the venue has internet — or plan a phone hotspot.
- ☐ Join a short walkthrough with us before the event.

That's it — we'll take care of the rest. Let's get your tournament looking great. 🍷🍷
