

Match-Day Checklist — Tournamate Pilot

Print this page and keep it at the control desk. Full instructions: the [pilot runbook](#).

Tournament: _____ Date: _____

Tournamate support: _____ Phone/WhatsApp: _____

Before the first game

- ☐ Venue wifi tested at the control desk — hotspot phone charged and ready as backup
- ☐ Signed in to the admin console; **Match Entry** open for today
- ☐ Public results page open on a spare phone (your live sanity check)
- ☐ Scorecards handed out to courts / stewards
- ☐ Printed schedule pinned up
- ☐ Everyone entering scores knows their job (console or QR scan)

During play

- ☐ Enter each score as the game ends — Match Entry or QR capture
- ☐ Photograph completed paper scoresheets and attach them to the match
- ☐ Between rounds, check the status strip: every played match shows **Results in**
- ☐ Late team or no-show? Use the score form's **late start / no-show / forfeit** options — never type a fake score (default rule: 4+ minutes late = forfeit)
- ☐ Court or time change? Move the fixture on the **Schedule** panel, then check for clash warnings
- ☐ **End of each phase** (e.g. end of pools): take a **Snapshot** before knockout play starts

If something goes wrong

Problem	Do this
Wrong score saved	Open the match, correct it, save — everything recalculates
Internet drops	Keep playing on paper; enter the backlog when it returns
Signed out	Normal after 10 min idle — just sign back in, nothing is lost
Public page "not updating"	Check the score was saved, then refresh the page
Big mistake / disputed result	Stop. Call support. A snapshot restore can rewind the division

End of day

- ☐ Every played match entered — nothing half-saved
- ☐ Public standings match the paper records
- ☐ **Snapshot** each division: End of day <date>
- ☐ Collect (or photograph) all paper scorecards
